SUMMARY REPORT
FT 950-I

January 1964

FOR RELEASE
March 23, 1964

IMPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States general imports, unadjusted for seasonal variation, from \$1,532.2 million in December to \$1,455.0 million in January, was primarily due to decreases in imports from Canada, Latin American Republics, and Western Europe.² Changes in the dollar values of imports from all areas from December to January were as follows: Canada, from \$350.9 to \$307.2 million; Latin American Republics, from \$332.9 to \$294.7 million; Western Europe, from \$421.7 to \$401.8 million; Japan, from \$118.0 to \$130.6 million; Sino-Soviet bloc countries, from \$6.0 to \$7.9 million; and "all other countries", from \$302.6 to \$312.8 million.

The Bureau also pointed out that from December 1963 to January 1964 imports from O.E.C.D. countries in Europe decreased from \$409.9 to \$389.2 million, while those from

E.E.C. (European Economic Community) countries increased slightly from \$220.2 to \$220.7 million.

The drop in imports from South America, from \$243.0 million in December 1963 to \$199.8 million in January of 1964, reflected lower levels of imports from Brazil, from \$67.5 to \$43.6 million; Argentina, from \$20.9 to \$11.6 million; and Peru, from \$21.6 to \$13.4 million. Imports from North America fell from \$494.3 to \$457.9 million owing chiefly to a substantial decrease in imports from Canada, from \$350.9 to \$307.2 million. This decrease, however, was partly offset by an increase in imports from Mexico, from \$55.6 to \$63.6 million. Imports from Europe declined from \$427.6 to \$409.3 million primarily due to decreases in imports from the United Kingdom, from \$91.6 to \$83.5 million; Italy, from \$43.5 to \$36.3 million; and Sweden, from \$20.6 to \$13.6 million. However, imports from the Netherlands rose from \$16.2 to \$23.6 million. Imports from Australia and Oceania fell from \$43.2 to \$35.7 million. This change was mainly accounted for by a decrease in imports from New Zealand and Western Samoa, from \$12.4 to \$7.6 million. Imports from Africa declined from \$71.0 to \$67.6 million.

The rise in imports from Asia, from \$252.1 million in December to \$283.0 million in January was mainly due to increases in imports from Japan, from \$118.0 to \$130.6 million and Indonesia, from \$8.0 to \$13.4 million.

¹On a seasonally-adjusted basis, total general imports were valued at \$1,429.9 million in January as compared to \$1,480.0 million in December. (See the January 1964 issue of Report No. FT 900-I.) Seasonally-adjusted data are not available by country of origin.

²Beginning with the January 1964 issue of this report, the list of areas and countries shown at the top of the table of this report is being revised to include summary totals for "E.E.C." (European Economic Community) countries, "Sino-Soviet bloc" countries and "Japan." Summarized information for the "sterling area countries" shown in previous issues of this report, is being discontinued.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through United States Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from in transit merchandise only in the manner in which it is documented.

COUNTRY DEFINITION: Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, landing, or the country in which mixed lots of various origin are consolidated. It follows, therefore, that imports from such merchandising or transshipment countries are likely to be overstated and imports from other countries correspondingly understated.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. They exclude

United States import duties. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data (i.e. formal entries valued under \$100 and all informal entries valued under \$250), and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all import entries. The probable variability due to sampling is either less than \$50,000 (the largest variation from rounding of figures) or less than 1 percent of the individual totals shown.

In addition to the effects of sampling variation, and the difficulties described above under COUNTRY DEFINITION, monthly import statistics are subject to some error from such sources as the carry-over of data from month to month in the compiling process and errors in reporting or processing. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Reports No. FT 110 and FT 120. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES GENERAL IMPORTS, BY COUNTRY OF ORIGIN: JANUARY 1964 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. General imports are a total of imports for immediate consumption plus entries into bonded warehouses. Data revised to reflect all corrections published with statistics through those for December 1963. Totals represent unrounded figures, hence may vary slightly from rounded amounts.)

¹For definitions of countries as used in this report, refer to current edition of Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. ²The 1962 monthly average figures reflect corrections to the 1962 statistics which were published during 1963 and, therefore, may differ from similar figures shown in the December 1963 issue of this report which were not revised to reflect these corrections. ³Excludes February 1962 data on \$1-99 formal and \$1-\$250 informal entry shipments which are estimated as totaling about \$9.7 million. Data on these shipments are included in the figures shown in Summary Report FT 900-1 but are excluded from other reports such as FT 930-1, FT 110, FT 120, IM 145, etc. ⁴Effective with the statistics for July 1962, the country designation "Portuguese Asia, n.e.c.," comprising Goa, Damao, Diu and Portuguese Timor became obsolete. Beginning with the September 1962 issue of this report, data for Goa, Damao, and Diu are shown separately while data for Portuguese Timor are included, along with that for other countries, in the figures shown for "Southern and Southeastern Asia, n.e.c." ⁵Country designation "Malaysia" established January 1964.
